Autismwhisper's stars are drawn from autistic accessibility needs, in collaboration with our good friends The family Stoltze, during a holiday in Berlin. No one in the family has autism. It is a TOTALLY neuro typical family, which is quite wonderfully spacious. They have chosen us as friends BECAUSE we are who we are - they like us just as we are and it creates unique friendships.

Together we actively into each other's worlds and for us, they are some unique sparring partners acc. Creating foundations "*as close to normal as possible,*" hand in hand WITH autism, not against.
